Changing WordPress Passwords

This tutorial assumes you are already logged into WordPress.

From the **DASHBOARD** click to expand the **USERS** option.

Click on **YOUR PROFILE**.

Scroll all the way down.

Enter a new **PASSWORD**.

Reenter your new **PASSWORD**.

The strength indicator will tell you how strong your new password is.

Click **UPDATE PROFILE**.

Your password has now been changed.

You now know how to change your password in WordPress.
