How to Change your WHM Password

This tutorial assumes you have already logged into WHM.

Click on the **PASSWORD MODIFICATION** link.

Remember that the **WHM PASSWORD** is the same as the **CPANEL PASSWORD** for your main account.

Select your main account from the **ACCOUNT SELECTION** screen.

Now enter a **NEW PASSWORD** in the provided box.

Scroll down.

Click the **CHANGE** button.

You've successfully changed your main password!

Click **LIST ACCOUNTS**.

Since you've just changed the WHM password, you will be **REQUIRED TO LOG IN** again before being able to do anything else in WHM.

You now know how to change your WHM password!

REMEMBER: keep your password in a safe place. Although you can change the passwords for any account in your WHM from WHM, you cannot retrieve a lost WHM password. If you lose it, you'll have to contact your **RESELLER PLAN PROVIDER** to have it reset or changed.
